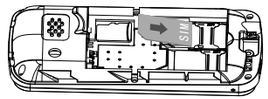
14. **Torch LED**
15. **Headset jack** for 3.5mm standard headset.
16. **Micro USB port**
    Charging port or connect to PC.

Insert SIM card, memory card and battery

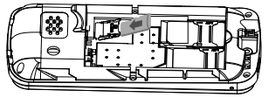
The SIM card and memory card holders are located under the battery.

1. Carefully press with your thumb on the rear casing cover and move it up. Lift the cover off. In case the battery is inserted, lift it with your fingernail and remove it.
2. Insert the SIM card under the metal bracket. Ensure that the SIM card contacts face down and the chamfered corner matches the bracket.



The SIM card contacts are not to be scratched or bent. Do not touch the contacts with your fingers

3. **microSD memory card**
   For using the high storage features of your telephone, particularly for photos, audio, etc. you need to insert a microSD memory card.
   Insert the memory card in the slot: slightly press on the card holder and move it carefully up. The memory card holder can be flipped open. Place the memory card level in the black plastic holder.



Ensure that the contacts of the memory card face down and that the projection matches the marked area. The memory card contacts are not to be scratched or bent. Flip the holder down and lock.

4. Insert the battery in the battery compartment, with the contacts top left.
5. Replace the cover and carefully press down with your thumb until it clicks in place.

⚠ CAUTION

Only use batteries, chargers and accessories approved for this model. Connecting other accessories from third party suppliers can be hazardous and can void the operating permit for the telephone as well as the warranty.

IMPORTANT

Only use compatible memory cards.
Compatible card types: microSD, microSDHC.
Incompatible cards can damage the card, the telephone and the saved data.
